- Tempered
- Low E
- Low E with Argon

TruSeal’s patent pending design incorporates unique materials and a breakthrough in continuous composite manufacturing processes. This advanced technology offers a higher performance spacer system at a competitive price. TruSeal takes optimum advantage of laminates and adhesives to reduce thermal conductivity while improving surface and corner appearance over other flexible spacers. This multi-layered spacer system featuring specialized components results in superior window performance and aesthetics over other warm edge spacers.

## Lexington Series™ Double Hung Window

- \* The double hung sill is engineered with a “sash support” that keeps the bottom sash rail fully supported when exposed to high winds
- ④ Interior leg of the sill is designed to withstand heavy storms and driving rains (DP50)
- \* The addition of interior vertical walls in the head and sill provide strength and support to the welded corners
- ⑤ 7/8” Insulated Glass for energy efficiency, security, increased structural performance, and blinds between the glass
- ⑥ Equal lite sash design provides a clean, balanced look to the interior grilles and grilles between the glass
- ⑦ Unique interlock design and custom flush lock provides improved security and an uninterrupted seal for improved performance
- \* Strategically placed, computer-designed metal reinforcements add strength to the window, and significantly improve the overall performance

### Features and Benefits

- ① Multi-chambered profiles with heavy wall thickness for greater strength and rigidity
- ② Balance shoe pockets are supported with double walls on each side, as well as vertical walls below to minimize deflection
- ③ Recessed interior on the main frame allows the sill dam leg to overlap the frame for a tight seal and a smooth, flush appearance

Lexington Series™  
can be enhanced for Impact Rating  
(Zone 3)

## Picture Windows - Custom Shapes

There is no limit to the look you can give to your home: trapezoids, arches, triangles, pentagons, quarter rounds and half rounds. All are available to help you find that perfect combination.

## Custom Made to Fit Precisely the Window Openings in Your Home

You can be sure your windows and special shapes will fit perfectly, because each window is custom made to fit each window opening in your home.

available in replacement (4500)  
and new construction (4600)

Available in a Variety of Colors to Enhance the Exterior of Your Home

stock beige

plus 17 specialty colors

## Double Slider Window

A window designed to open up  
any room in the house

Easy to operate no matter how large the window, this double slider will open even the largest room to new light and distinctive style. Available in 2-lite or 3-lite configurations in a number of panel and picture window sizes, this window can be designed to accommodate any size room or wall opening.

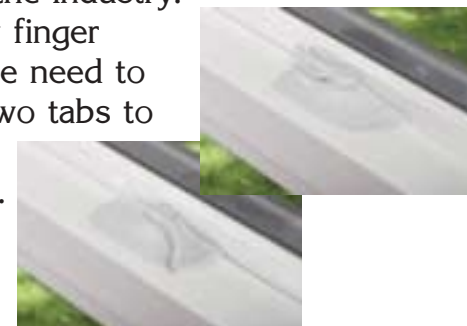

When you combine these configurations with custom shapes and sizes, you create new dimensions in living. Limited only by your imagination, the Lexington Series™ all vinyl

window system can be sized and shaped to provide a unique look that sets your home apart from the others.

## Lex-Ease™ by Truth

The Lex-Ease™ operating system, as manufactured by Truth, is the most finger-friendly means of opening and closing windows in the industry. No unsightly finger latches or the need to coordinate two tabs to release the bottom sash.

Simple: turn the low profile release lever to either lock, unlock or tilt-in the sash. The Lex-Ease™ system will either allow the sash to rise to your desired height or tilt-in gently to your waiting hand.

Try it and see how easily it works  
for you
